

INSTALLATION

There are five models of Kleen-Screen. Be sure to select the correct size and correct model for your urinal. Occasionally it is necessary to trim the Kleen-Screen to fit... this is easily done with scissors.

FITTING

A proper fitting Kleen-Screen will seal off around all edges, slightly starting from back of urinal to front.

TAILORED TO FIT

Kleen-Screen is tailored to fit. Five sizes fit 90% of all urinals.

GENERAL

All-vinyl Kleen-Screens are not affected by acids, caustics or drip-dry deodorant and need not be cleaned more than two or three times a year.

REMOVAL OF WASTE MATERIAL

Entire screen may be removed for cleaning with special removal tools enclosed with your Kleen-Screen.
